

Juststandout delivers Energy Solutions that keep your families or corporations safe, happy, healthy and profitable. We deliver and maintain high quality solutions, products and services: 1-25 years of manufacturers warranty.

Our Focus

- ◆ **Alternative Energy Solutions**
- ◆ **Mechanical and Electrical Solutions**
- ◆ **Consulting and Training**

“To maximize the value of your projects talk to us before you talk to your architects, builders or engineers.

#DSERA

Smart Inverters

Alternative Energy

We offer the best solution available with the latest technology for your alternative energy needs.

Juststandout Smart Hybrid & String Inverters:

- ♦ Diesel Gen Application, Low Maintainance, **IP65** rated.
- ♦ Remote monitoring and control, AC coupling capability.
- ♦ Parallel capability up to **16 units**.
- ♦ Ability to continuously update the benefits or functions remotely.

Available in:

- ♦ Smart Hybrid: **3.6 kw, 5kw, 8kw, 12kw (3Phase), 16kw, 50kw (3Phase)**
- ♦ Smart String: **8kw, 12kw (3Phase), 50kw (3Phase)**
- Warranty: **5** years.

Power Vault

Powervault:.

- ♦ **1 MWH** (Megawatt Hour) = **20ft** Container.
- ♦ **2MWH** (Megawatt Hours) = **40ft** Container.
- ♦ Lower Capex Investment.
- ♦ Suitable for Manufacturing Industry, Data Centers, Hospitals, Minigrids, Emergency Power e.t.c.

Pylontech Lithium-ion Batteries (LV & HV):

- ♦ Modular design for ease of expansion, up to **16** units without a hub, with a hub total storage can go up to **2.7Mwh**.
- ♦ DOD (Depth of discharge) **95%**.
- ♦ Intelligent BMS protecting battery cells.

Available in Low Voltage (LV): **UP5000 & US3000C**
Available in High Voltage (HV): **H48074**

-Warranty: **10** years.

Suitable for: Campuses, Offices, Hospitals, Schools, Farms, Estates, Communities, ATM Machines e.t.c.

**Pylontech Lithium-ion
Batteries (LV & HV)**

GenPAL Inverter AC

Variable Frequency Drive

Control Panels

Services

Mechanical and Electrical

We offer a full state of the art range of Mechanical and Electrical products and services, for your security, comfort and energy savings, and more importantly these help increase efficiencies within the structures, which is one of the most important aspects of delivering value to our clients.

Products:

1. GenPAL Inverter AC:

Helps you save up to **70%** on power consumption, **47%** Faster cooling with Turbo, Low voltage.

2. Variable Frequency Drive:

- ◆ Increases the potential savings by up to **70%**.
- ◆ Greatly reduces the return time on investment
- ◆ Excellent overload performance: **150% 60s, 180% 3s, 200% 1s** (normal test environment).

3. Distribution:

- ◆ Panel & distribution boards, change overs, breakers **MCB, RCCB**, e.t.c
- ◆ Protection: Earthing, surge protectors, voltage regulators, AVS, UPS.
- ◆ Transmission: Package sub-stations, Transformers, RMU e.t.c.

Services:

Electrical Inspections - All electrical installation deteriorate with age and use so we advise you to carry out periodic inspections on new or existing structures.

Electrical Installations:

Electrical Inspections - We offer full electrical installations and supervision for alternative energy projects.

Consulting and Training

We have hundreds of operational solutions positioned throughout the Nigerian market and have earned the reputation as a trusted and reliable adviser.

- ◆ We consulted for World Bank Grant Administrator for Solar Home Systems SHS for PricewaterhouseCoopers International Limited PWC.
- ◆ We consulted for the American University of Nigeria in Yola for their High, Medium and Low voltage project, including substations.
- ◆ We are consultants and procurement specialists for the 32kwp solar project for Bingham University Teaching Hospital in Jos, we are also electrical consultants for the Olive Multi Specialist Hospital in Lekki, Lagos and Brains and Hammers.
- ◆ We consulted for the following solar projects: Italian Embassy, Brains and Hammers, Japanese Grassroot, Panasonic, St Kizito Clinic and Ibadan Catholic Hospital.
- ◆ We develop solar PV trainings at our training facility and at the customer's site in accordance with international competency standards and accreditation requirements.

The Support and advise we give our clients includes, business and commercial strategies that enable them deliver projects on time, within their target budget and of the best possible quality.

About Us

Juststandout is an industry leader providing Electrical and Mechanical solutions for business and residential operations. These solutions, where power quality and reliability are essential, could be grid, off grid or for emergency use. We have earned the reputation as a reliable and strategic partner.

At Juststandout our mantra is DSERA. We believe Decentralization, Storage, Efficiencies, Recycling & Repurposing and Artificial Intelligence are keys to reducing our carbon footprints while delivering our energy needs. Our local message is akin to bridging the kilowatt divide while reducing our carbon footprint.

Today Storage is the Key of keys and that is why we have partnered with Pylontech Technologies to deliver the best Lithium ion batteries to West Africa, with a **10** year warranty.

In the last **24** Months we have delivered over **10.2Mwh** of Pylontech Lithium-ion batteries in partnership with top developers and businesses in the Nigerian Renewable Sector. For the last **13** years we have implemented and continued to provide power backup solutions for the Cisco office in Lagos. We were also part of the Cisco team that delivered power backup for the NNPC refinery in Warri for their digital telecom project.

We have worked with the Japanese grassroots and Development Africa to deliver these impactful solar projects: **36.5kwp** for Poly General Hospital Enugu, Elegushi Medical Center **31.2kwp** and **25.8kwp** Solar Upgrade for Rufkat Danjuma Maternity Takum, Taraba.

Every Juststandout Solution begins with designing or renovating Energy Systems within a structure to minimize energy consumption so we can address your needs and goals at the lowest possible CAPEX and OPEX while reducing your carbon footprint over the life of your projects.

“To maximize the value of your projects talk to us before you talk to your architects, builders or engineers.

If you have already started, make room for a well vented power house minimum of 1.5 m x 1.2 m, conduits to the roof for solar and adequate distribution board for alternative and regular power”.

Juststandout is a proud sponsor of Nigerians for Super Energy Initiative and Light up a Precious Life.
